

Stimul-8 is a biostimulant combining chitosan, a naturally derived plant defense elicitor, with yucca extract to enhance turf performance, stress tolerance and nutrient uptake. Together, these components strengthen plant defenses while improving water movement and nutrient absorption, resulting in healthier, more resilient turf.

- **Activates plant defense pathways to improve stress and disease tolerance**
- **Promotes root development, chlorophyll synthesis, and photosynthesis**
- **Delivers reliable, cost-effective performance**
- **Tank-mix compatible with translaminar movement to enhance uptake**

Product information

- **Formulation type:** Liquid
- **Classification:** Biostimulant
- **Pack Size:** 9.46L
- **Active Ingredients:** Chitosan 1%, Yucca Schidigera extract 6%

Application information

- **Application Rate:** 12 ml per 100 m²
- **Water Volume:** 4-12 l per 100 m²
- **Frequency:** Weekly to monthly
- **Application method:** Foliar or soil-applied

Areas of use

- Fine turf and home lawns
- Specialty crop
- General agriculture

Recommended application period

For best results, use Stimul-8 prior to the onset of stress

Ideal during periods of heat, drought or recovery
